

HEALTHCARE RISK MANAGEMENT

Intercontinental Hotel, Bahrain 2017

We live in a challenging world of continuous change and chaos. We run business seeking profit and success. However, we need to consider the uncertainty to achieve our business objectives and be successful. Risk is the negative incidence that interferes with achieving the business strategic and operational objectives. And Risk Management is basically an approach in which we explore, identify, analyze and mitigate the risks that can affect our projects and business.

TOPICS TO BE COVERED:

1. Strategy and Risk Management Terms
2. ISO 31000 Risk Management Principals
3. Risk Management Framework: Developing Risk Context, Risk Assessment and Risk Treatment
4. Developing Risk Management Registrar
5. Clinical Risk Management : Identify the priorities
6. Risk Management Tools & Methodologies e.g. Failure Mode and Effect Analysis (FMEA) & Mistake Proofing (Poka Yoke) and Root Cause Analysis
7. Barrier-based Risk assessment (Bowtie) Methodology
8. Hand on Practice and training on implementation of BowtieXP Software
